Acceptance Letter

Paper ID	Paper Title	Author's Name
ICOEI-366	Integrating EfficientNet-B0 and Vision Transformers for Enhanced Global and Local Diagnostic Reasoning	K.Vinod Kumar Reddy, Mounika Golla, Shaik Arshiya Tarannum, Jhansi Lakshmi Mandugula, Harshini Vidapanakallu

Dear Authors,

On behalf of the Conference committee, we would like to congratulate you on your article to the 9th ICOEI 2026 - IEEE International Conference, which will be held from **21-23, April 2026** at **SCAD College of Engineering and Technology**, Cheranmahadevi, Tirunelveli, India. You have been selected to deliver your presentation at the 9th International Conference on Trends in Electronics and Informatics 2026.

As a result of the review and results, we are pleased inform that you can now submit the camera-ready paper for inclusion into the 9th ICOEI 2026 proceedings. We appreciate if you could send the final version of your research paper at your earliest convenience, in order to ensure the timely publication. When submitting your final paper, please highlight the changes made according to the review comments.

Yours' Sincerely,

Dr. R. Karthik Ganesh
Organizing Secretary
ICOEI - 2026

Conference Review Comments

Reviewer comments-1

1. The author should explain how class imbalance among the seven lesion categories is handled.
2. Kindly explain how the 1×1 convolutional projection layer aligns the 320-channel CNN feature maps.
3. The author should discuss the motivation for selecting EfficientNet-B0.
4. Clarify how the hybrid architecture improves recognition of the fine textures and global lesion structure.
5. The author could clarify the reason for using macro-averaged F1-score.
6. Figures must be appropriately placed and referenced within the text (e.g., 'as shown in Figure 1').
7. The conclusion and future scope sections should be consolidated into a single, well-structured paragraph. Kindly review and revise these sections accordingly.
8. The result table should be presented in the appropriate and standardized format.

Reviewer comments-2

1. Provide a detailed explanation of the research procedure so that other researchers can replicate the study.
2. Present numerical performance evaluations by comparing the proposed approach with existing techniques.
3. Include comparative benchmark analyses based on widely accepted assessment metrics.
4. Clearly emphasize the originality and key contributions introduced by the study.
5. Explain in what ways the proposed work extends or improves upon previous research efforts.
6. Describe the real-world relevance and possible practical uses of the obtained results.
7. Conduct a critical review of earlier studies to clearly point out unresolved research issues.
8. Maintain high resolution and uniform formatting for all figures and tables, provide in-text citations.
9. Ensure references are properly cited and discussed within the manuscript, in the following format: [1], [2], [3], etc.
10. Revise the related work section by incorporating recent publications from the past three to five years.
11. Verify that in-text citations accurately correspond to entries in the reference list.
12. Adhere strictly to the required referencing and formatting guidelines (Chicago or APA style).
13. Eliminate page headers, footers, and numbering in accordance with the submission requirements.
